REACTION™ | LOW FLOW

*the* ONLY LOW FLOW SHOWERHEAD  
YOU *will* ENJOY

A reaction, our body's spontaneous response to our environment's stimuli. We react to literally everything. When bathing, in particular, our senses are trained to expect powerful, forceful waves to be dispersed onto our skin. The Reaction™ Low Flow showerhead, using a uniquely new technology, is scientifically engineered and statistically proven to manipulate the senses into believing that the pulsating, temponic currents are that of 2.5 gpm showerhead. So, we have to ask...What's Your Reaction?
