

BUFFET BURNERS™

TAKE CONTROL OF YOUR HEAT

Take control of your costs and increase your profits by switching to Buffet Burners™ for your chafing dish heat. The benefits are more than just the savings.

COST BENEFITS

**One burner equals an estimated 5,000 cans of fuel!
Up to four burners will run on ONE 120 volt outlet using minimal electricity!**

SAFETY BENEFITS

Open flame safety hazards are eliminated with the Buffet Burner. An internal high temperature limit switch cycles off when temperatures get too hot.

INTERCHANGEABLE

The slim stainless steel profile and patented magnetic design allow our heater to fit most any full size chafing dish. Quickly attaches to your existing chafers.

VARIABLE TEMPERATURE SETTINGS

Maintaining temperatures is mandatory in preserving food quality and safety. Our "smart" controller allows the user to select and adjust the intensity of the desired temperature. Buffet Burners are not affected by wind or external temperatures. Heat is always steady and consistent, holding food at safe temperatures.

ENVIRONMENTALLY FRIENDLY

Buffet Burners™ are a non consumable product and do not produce any fumes or odors. Green benefits include less damage to our ozone by the elimination of harmful emissions and continual waste associated with chafing fuels and gels.
